## Experience

**Full-Stack Web Developer** **Gled International Education** **Feb 2025 - Present**

**Tech Stack:** TypeScript, Next.js, NestJS, Fastify, Shadcn/ui, Prisma, MongoDB, PostgreSQL, Moodle

- Development and maintenance of modern web applications using Next.js (App Router) and TypeScript, ensuring high performance and scalability
- Creation of robust and efficient APIs with NestJS and Fastify, following best practices for quality code
- Implementation of responsive and accessible interfaces with Shadcn/ui, integrating reusable components and consistent design system
- Data management with Prisma ORM in relational (PostgreSQL) and non-relational (MongoDB) databases, optimizing queries and data models
- Moodle integration via custom APIs for e-learning functionalities such as unified authentication and course management
- Collaboration in agile teams (Scrum/Kanban), using Git for version control and CI/CD practices
- Resolution of complex performance and debugging problems in full-stack environments (frontend and backend)

**Full-Stack Web Developer** **Yoobe** **Sep 2023 - Feb 2025 · 1 yr 6 mos**

**Tech Stack:** TypeScript, Next, Tailwind CSS, Ant Design, Shadcn/ui, Postgres

- Development of new projects using technologies like NextJS and NestJS
- Bug fixes and implementation of new features in web applications written in NextJS
- Constant contact with other department managers for better understanding of business rules
- Regular use of versioning systems for better team work organization

**Full-Stack Web Developer** **DalaCode** **Apr 2023 - Aug 2023 · 5 mos**

**Tech Stack:** SQL, Vue.js, PHP

- Continuous maintenance of mobile application developed in Vue.js, ensuring its performance and functionality
- Collaboration with development team to understand technical updates and implement them in the application
- Implementation of new features and interface improvements in mobile application using Vue.js
- Problem solving and debugging to ensure application stability
- Active participation in PHP web application maintenance, including problem resolution and performance optimization
- PHP functionality customization according to project requirements
- API and external services integration to improve functionality and user experience
- Use of version control systems to coordinate changes and collaborate with development team

**Front-End Web Developer** **Devopness** **Jul 2022 - Sep 2022 · 3 mos**

**Tech Stack:** Eleventy, Storybook, React

- Continuous update of web application design system using React, applying Storybook technology to ensure efficient processes
- Use of 11ty technology to generate dynamic and optimized documentation pages
- Documentation accessibility assurance, adhering to accessibility standards and making adjustments as needed
- Agile collaboration with colleagues through version control systems like Git to maintain effective workflow

## Skills

**Programming Languages:**  JavaScript,  TypeScript,  Python,  HTML,  CSS

**Front-end:** ReactJS, NextJS, VueJS, Tailwind, styled-components, Shadcn, Storybook, Eleventy (11ty)

**Back-end & Runtime:** NodeJS, NestJS, Fastify, Elysia, Bun

**Databases:** SQL, PostgreSQL, MySQL, MongoDB, Redis

**Cloud & DevOps:** GCP, AWS, Azure, Linux

**Testing & Automation:** Selenium, Puppeteer

**Other Tools:** Power BI, Figma, Moodle API

**Languages:** English (intermediate), Portuguese (native), Spanish (native)
